-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a dietary supplement comprising a nutritionally effective amount of isolated and purified galactose, glucose, mannose, N-acetylneuraminic acid, fucose, N-acetylgalactosamine and xylose, classified in class 424, subclass 408.
- II. Claims 5-8, drawn to a dietary supplement comprising isolated and purified acetylated mannose, and at least five isolated and purified saccharides from a recited Markush group, classified in class 514, subclass 22 or 23 or 53-64.
- III. Claim 9, drawn to a dietary supplement composition comprising at least two powdered saccharides, classified in class 424, subclass 489.
- IV. Claim 10, drawn to a dietary supplement composition comprising at least six powdered saccharides, classified in class 424, subclass 489.
- V. Claims 11-23, drawn to a dietary supplement comprising a nutritionally effective amount of at least six essential saccharides, classified in class 514, subclass 22 or 23 or 53-62.
- VI. Claim 24, drawn to a dietary supplement comprising a composition comprising a first and a second isolated and purified saccharide, classified in class 426, subclass 658.

Art Unit: 1654

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the six different groups are directed to six different compositions, wherein the six distinct and separate compositions comprise numerous permutations or numerous carbohydrate ingredients having different forms (*i.e.*, capsule or powder or predigested forms). Compositions comprising different ingredients are generally not expected to have the same functional effect.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
